Overview

OBE was founded in 1996 as an independent imaging and graphic design business on Myrtle Avenue in Clinton Hill, Brooklyn. Proprietor Victor Odesanya's goal was to form a creative imaging services haven for the local community and beyond. OBE fosters an environment in which both novice and advanced computer users feel at home. OBE offers clients the opportunity to make their own creations at OBE's computer work stations, or work with OBE design and imaging professionals to have products prepared for you. Students, artists, local business-owners, and other professionals have benefitted from OBE's convenient services and hours of operation.
